Thank you. The TIM/McNest review was completed around March 7th?

The TIM/MCnest review is done.

The residue strategy work is not done. That work is expected to continue through the end of 2017.

Hi Kris,

Thanks for the note. I try to track things like this for end-of-FY reports. Along these lines, may I ask when/if the following two efforts concluded?

- Peer Review - TIM/Mcnest chapters for carbaryl & methomyl ESA-RA chapters

●□□□□□□□□ Neonics Residue Strategy Development

I believe the peer review was done and that the residue strategy work is on-going. Is that correct?

Thank you very much,

Greg
